

NURETTIN ENES KARAKULAK

FULL-STACK DEVELOPER | COMPUTER ENGINEER

Esenyurt, Istanbul, Türkiye | karakulak233@gmail.com | <https://enes-karakulak-portfolio.vercel.app>

Computer Engineering graduate with hands-on experience in full-stack web development, backend systems, ERP solutions, database design, and Unity game development. Experienced with Java, C/C++, C#, JavaScript, React, Spring Boot, Python, SQL, and REST APIs. Strong focus on scalable software architecture, database performance, responsive interfaces, and practical problem solving.

EDUCATION

KADIR HAS UNIVERSITY

Computer Engineering (English) | GPA: 2.87/4.00 | 50% Scholarship | Sep 2021 – Aug 2026

GAZI ANATOLIAN HIGH SCHOOL

GPA: 85/100 | Sep 2017 – Jun 2021

PROFESSIONAL EXPERIENCE

INTERN FULL-STACK DEVELOPER – Dorabase Veri Merkezi Hizmetleri A.Ş.

Jun 2026 – Aug 2026

- Developed and maintained React-based web interfaces and reusable frontend components.
- Integrated REST APIs and implemented form validation, pagination, sorting, dynamic rendering, and responsive layouts.
- Customized WHMCS client-area templates and improved customer service, profile, and dashboard pages.
- Worked with PHP/MySQL, database queries, API error handling, and frontend performance optimization.

INTERN SOFTWARE DEVELOPER – Erba Müh. Mak. San. Tic. Ltd. Şti.

Jan 2026 – Feb 2026

- Developed a backend data-logging module and an interactive dashboard for monitoring real-time CNC machine performance.
- Optimized relational database schemas and SQL queries to reduce reporting times.
- Implemented Role-Based Access Control (RBAC) and integrated PLC sensor data to track operational efficiency.

FREELANCE DEVELOPER

2024 – Present

- Developed and deployed web applications across the full project lifecycle, from concept to launch.
- Designed frontend and backend architectures, intuitive UI/UX interfaces, and efficient database schemas.
- Focused on application performance, maintainability, and scalability.

GAME SERVER DEVELOPER – Game Community Servers

2023 – 2025

- Developed system and script features for multiplayer game servers, including GTA V and Minecraft.
- Implemented custom backend logic and features to improve community engagement.
- Performed debugging and performance optimization to maintain server stability during peak activity.

TECHNICAL SKILLS

- Programming:** Java, C, C++, C#, JavaScript, Python
- Web & Backend:** HTML, CSS, React, Spring Boot, REST APIs, PHP
- Databases & Data:** SQL, MySQL, PostgreSQL, MongoDB, Data Structures & Algorithms, Database Design
- Software:** Object-Oriented Programming, Software Development, ERP, Generative AI, Photoshop, Excel
- Game Development:** Unity, Unreal Engine, Game Design
- Languages:** Turkish (Native) | English (Upper Intermediate)

SELECTED PROJECTS

ODOS: Slope-Based Pedestrian Navigation App

- Developed a cross-platform iOS and Android mobile application using a slope-based routing algorithm with Easy, Balanced, and Shortest route options.
- Implemented real-time activity tracking for distance, step count, and calories burned.
- Built community features for creating and sharing custom routes and interacting with user profiles.

Enterprise Resource Planning System

- Developed a web-based ERP solution for a steel processing company.
- Implemented real-time inventory management and tracking for industrial materials.
- Built inter-branch order management and communication features to streamline internal supply and material transfers.

Gym Management System

- Developed an end-to-end web platform for gym members and trainers.
- Integrated an AI-powered personalized workout-plan module and progress dashboards.
- Implemented PT scheduling, real-time community messaging, and an e-commerce module for memberships and equipment.

Too Early – Too Late: Pizza-Themed Mobile Game

- Developed a Unity 6 (URP 2D) mobile arcade game focused on timing and hand-eye coordination.
- Implemented score-scaled difficulty, mobile input handling, drag-and-drop Special Order gameplay, localization, XP progression, unlockable avatars, and Android IL2CPP builds.

Void Forge: Dark Fantasy Idle RPG

- Developed a Unity 6 (URP) dark fantasy Idle RPG with a 5,000-stage campaign, tick-based combat, four class roles, equipment rarity tiers, pets, and daily bosses.
- Implemented JSON save/load with backup and version migration, ScriptableObject balance tables, custom editor tools, offline earnings, and a six-tab mobile UI.

CERTIFICATIONS

- **Programming with Java – Amazon (2025)**
- **Introduction to Generative AI – University of Colorado Boulder (2025)**
- **Introduction to Front-End Development – Meta (2025)**
- **React Basics – Meta (2025)**
- **Image Editing – Adobe (2025)**
- **Data Structures and Algorithms – Microsoft (2026)**
- **Machine Learning Specialization – DeepLearning.AI (2026)**
- **Responsive Web Design – freeCodeCamp (2026)**
- **Unreal Engine Basics – Epic Games (2026)**
- **Game Design – Epic Games (2026)**
- **Unreal Engine for Beginners – Skillshare (2026)**
- **Unreal Engine: World Building Basics – Skillshare (2026)**
- **Unreal Engine Visual FX, Materials & Interactive Systems – EDUCBA**
- **Game Design and Development with Unity – Michigan State University (2026)**
